CARACTERISTICAS MALLORQUINA CORREDERA

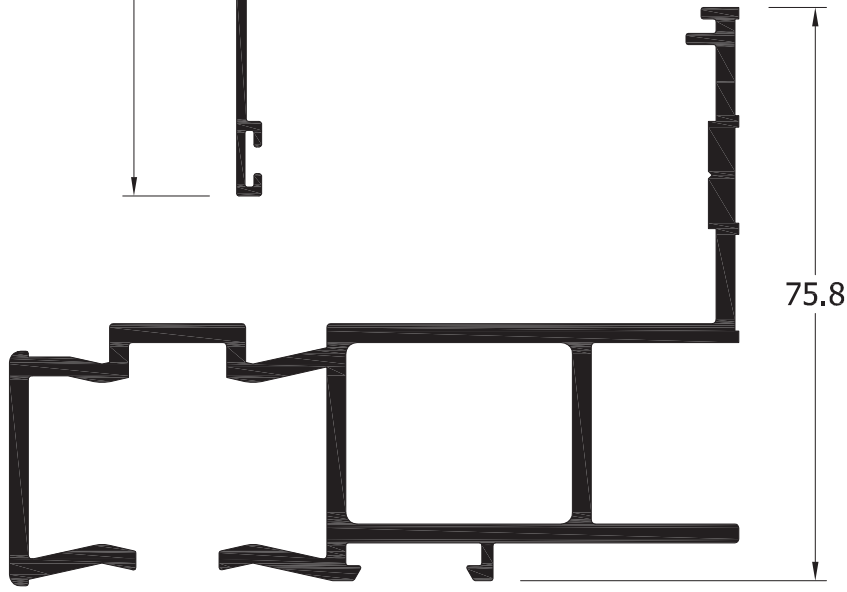

- Sistema de carpintería hoja perimetral para ventanas y puertas correderas.
- Posibilidad de lama fija y lama regulable.
- Cámara europea estandar para alojamiento de herrajes.
- Sistema que permite un alto grado de protección solar y óptima visibilidad exterior.
- Posibilidad de fabricación para fachada ó forjado.
- Permite una apertura de grandes dimensiones, dejando acceder al hueco total de la ventana o puerta.
- Características que cumplen las exigencias del mercado.
- Aleación 6063 T-5.
